Introduction

The brainchild of Eyal Gura, Zebra uses artificial intelligence (AI) and machine learning in the field of medical imaging and diagnostics

Aim to improve speed and accuracy of diagnosis and reduce errors

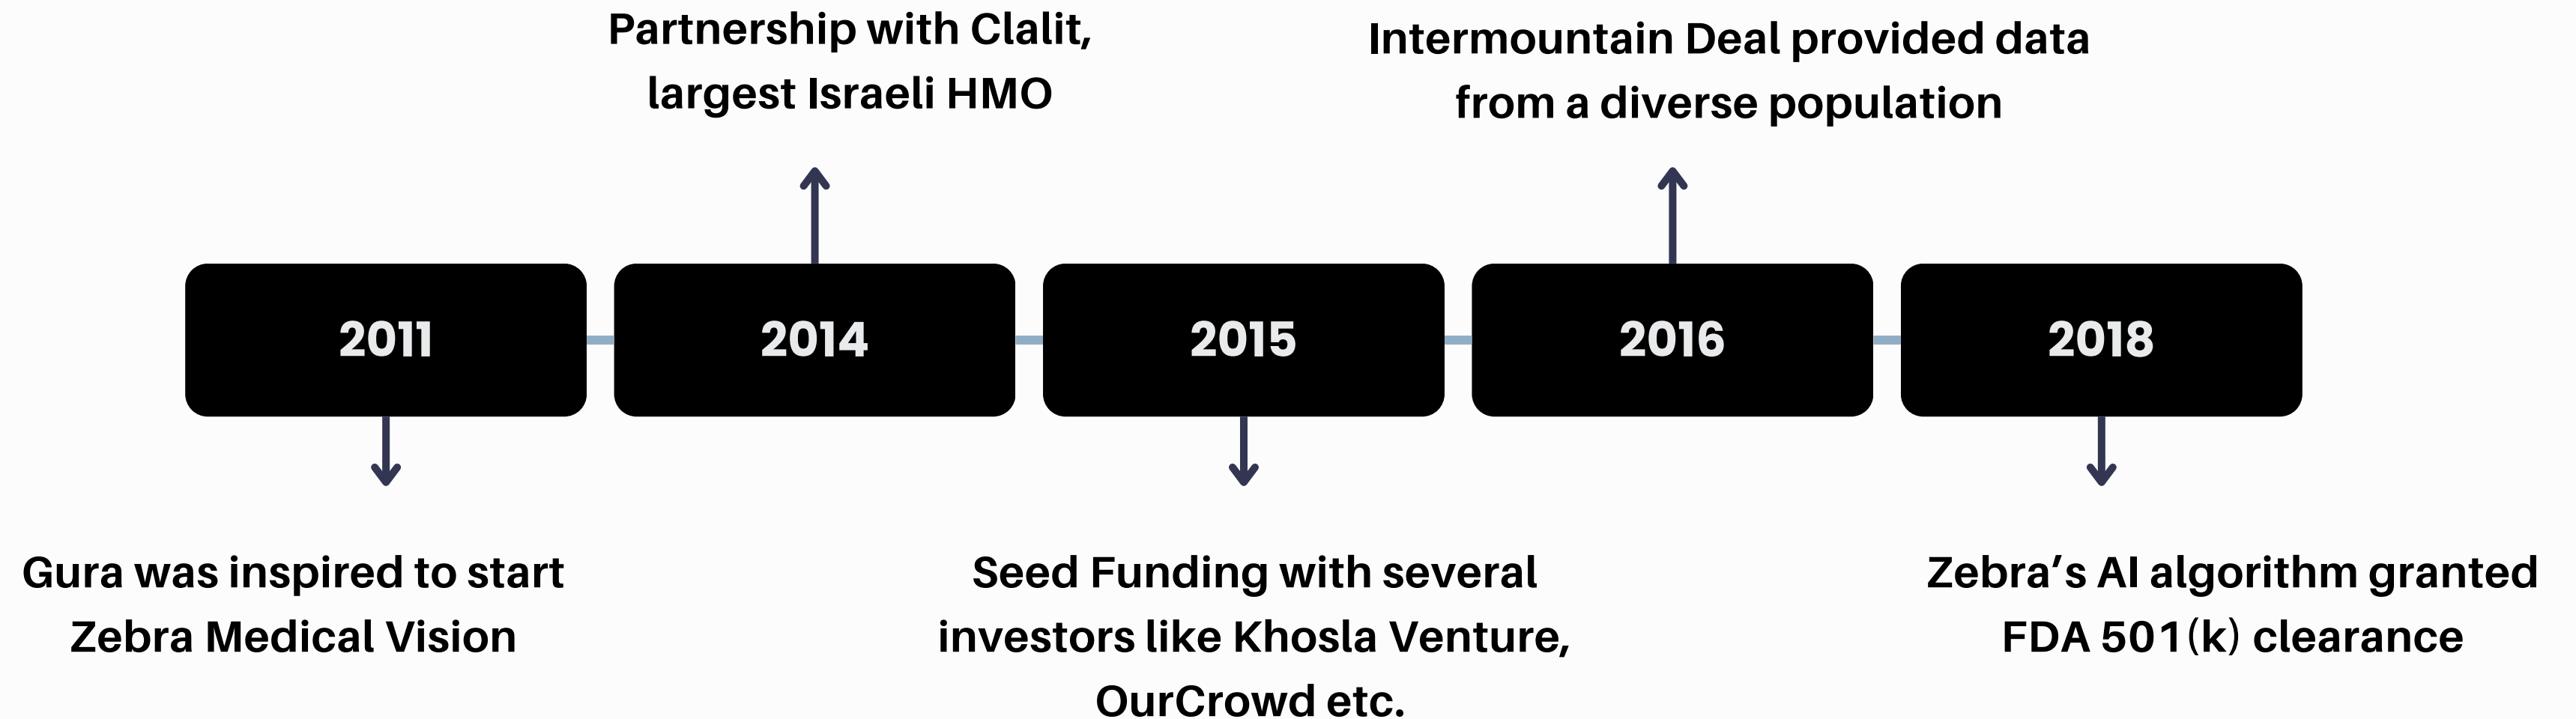

By 2018, Zebra had developed seven algorithms that produce diagnosis from X-rays, CT scans and mammograms

Zebra Medical Vision

A brief history

So Far..

1

Million Scans

8

Approvals

30

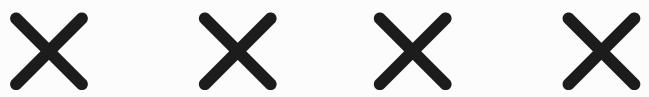

**Million dollars in Series C
Funding**

**Where do we go from here?
Accuracy or New Products? What about Markets?**

• Inaccurate diagnoses • Diagnosis in remote areas • Facilitating radiologists 	• More datasets • Collaboration with radiologists • Compliance with regulations • More products 	Constantly evolving and innovating algorithms for wide range of diagnosis	• Proprietary Data • Strategic partnerships • Cost leadership 	• Radiologists • Healthcare organizations • Data providers • Medical regulatory board 
	• Vol. of scans analyzed • CAC • R&D costs 		Healthcare institutions, hospitals, radiology clinics worldwide 	
• Algorithm R&D • Sales - marketing efforts • Data analysts & policy managers 			\$1 per scan fee for scan analysis 	

SWOT Analysis

Strengths

- Advanced AI Technology
- Existing data set
- Industry Recognition
- Versatile Services

Weaknesses

- Longer time to market
- No International Partnership
- Single Revenue Stream

Opportunities

- Emerging Markets
- Diverse Diagnostic offerings
- Telemedicine Growth
- Partnerships with Healthcare Professionals

Threats

- Regulatory Hurdles
- Competitive Landscape
- Market Education
- Data Privacy and Security

Good

Financial health
\$30M raised in 2018

Strong

Management team with
experience
in med-tech

Growing

Customer base

Buy Build Partner Analysis

Competitive Landscape

AI-powered solutions for
medical imaging

Growth Potential

high demand, improve
accuracy and efficiency

Potential to expand

Geographical,
new product line

Robust

resources for new AI-
powered solutions, team
of engineers and
scientists

Buy

- Acquire companies in med-tech space to **expand product offerings**. eg: cardiology, oncology, stroke detection
- Acquire companies in med-tech space having **strong Go-To-Market strategy**

Cost, Strategic alignment,
Financial performance,
Management team, Competitive
landscape, Growth potential,
Integration challenges, Culture fit,
Regulatory considerations

Build

- Improve **existing algorithms**
- Build **new medical imaging applications**
- Develop **new tools** to help radiologists with other tasks, such as reporting or diagnosis

Technology Feasibility, Cost,
Time, Resources, Risk, Benefit,
Alignment with business goal

Partner

- **Healthcare IT companies**- helps hospitals and clinics
- Medical imaging device manufacturers- helps radiologists
- Pharmaceutical companies- improve development of new drugs through image scanning
- Government
- **Research institutions**- conduct research on new AI-powered solutions for medical imaging

Strategic alignment, Culture Fit, Technology Capability, Financial Stability, Reputation, Win-Win

Arenas

- USA, Europe, India and Israel
- China and other developing countries
- Established healthcare chains

Vehicles

- Organizational Growth
 - Talent acquisition team (internal and third party)
 - Sales and marketing team (international partnerships)
 - Big Data (Data Warehousing and Data Engineering)
 - Data Science (RnD department and New Flows)
 - Legal and Intellectual Property team
 - Medical Specialists
 - Design and Development team
 - PM team
 - Administration team

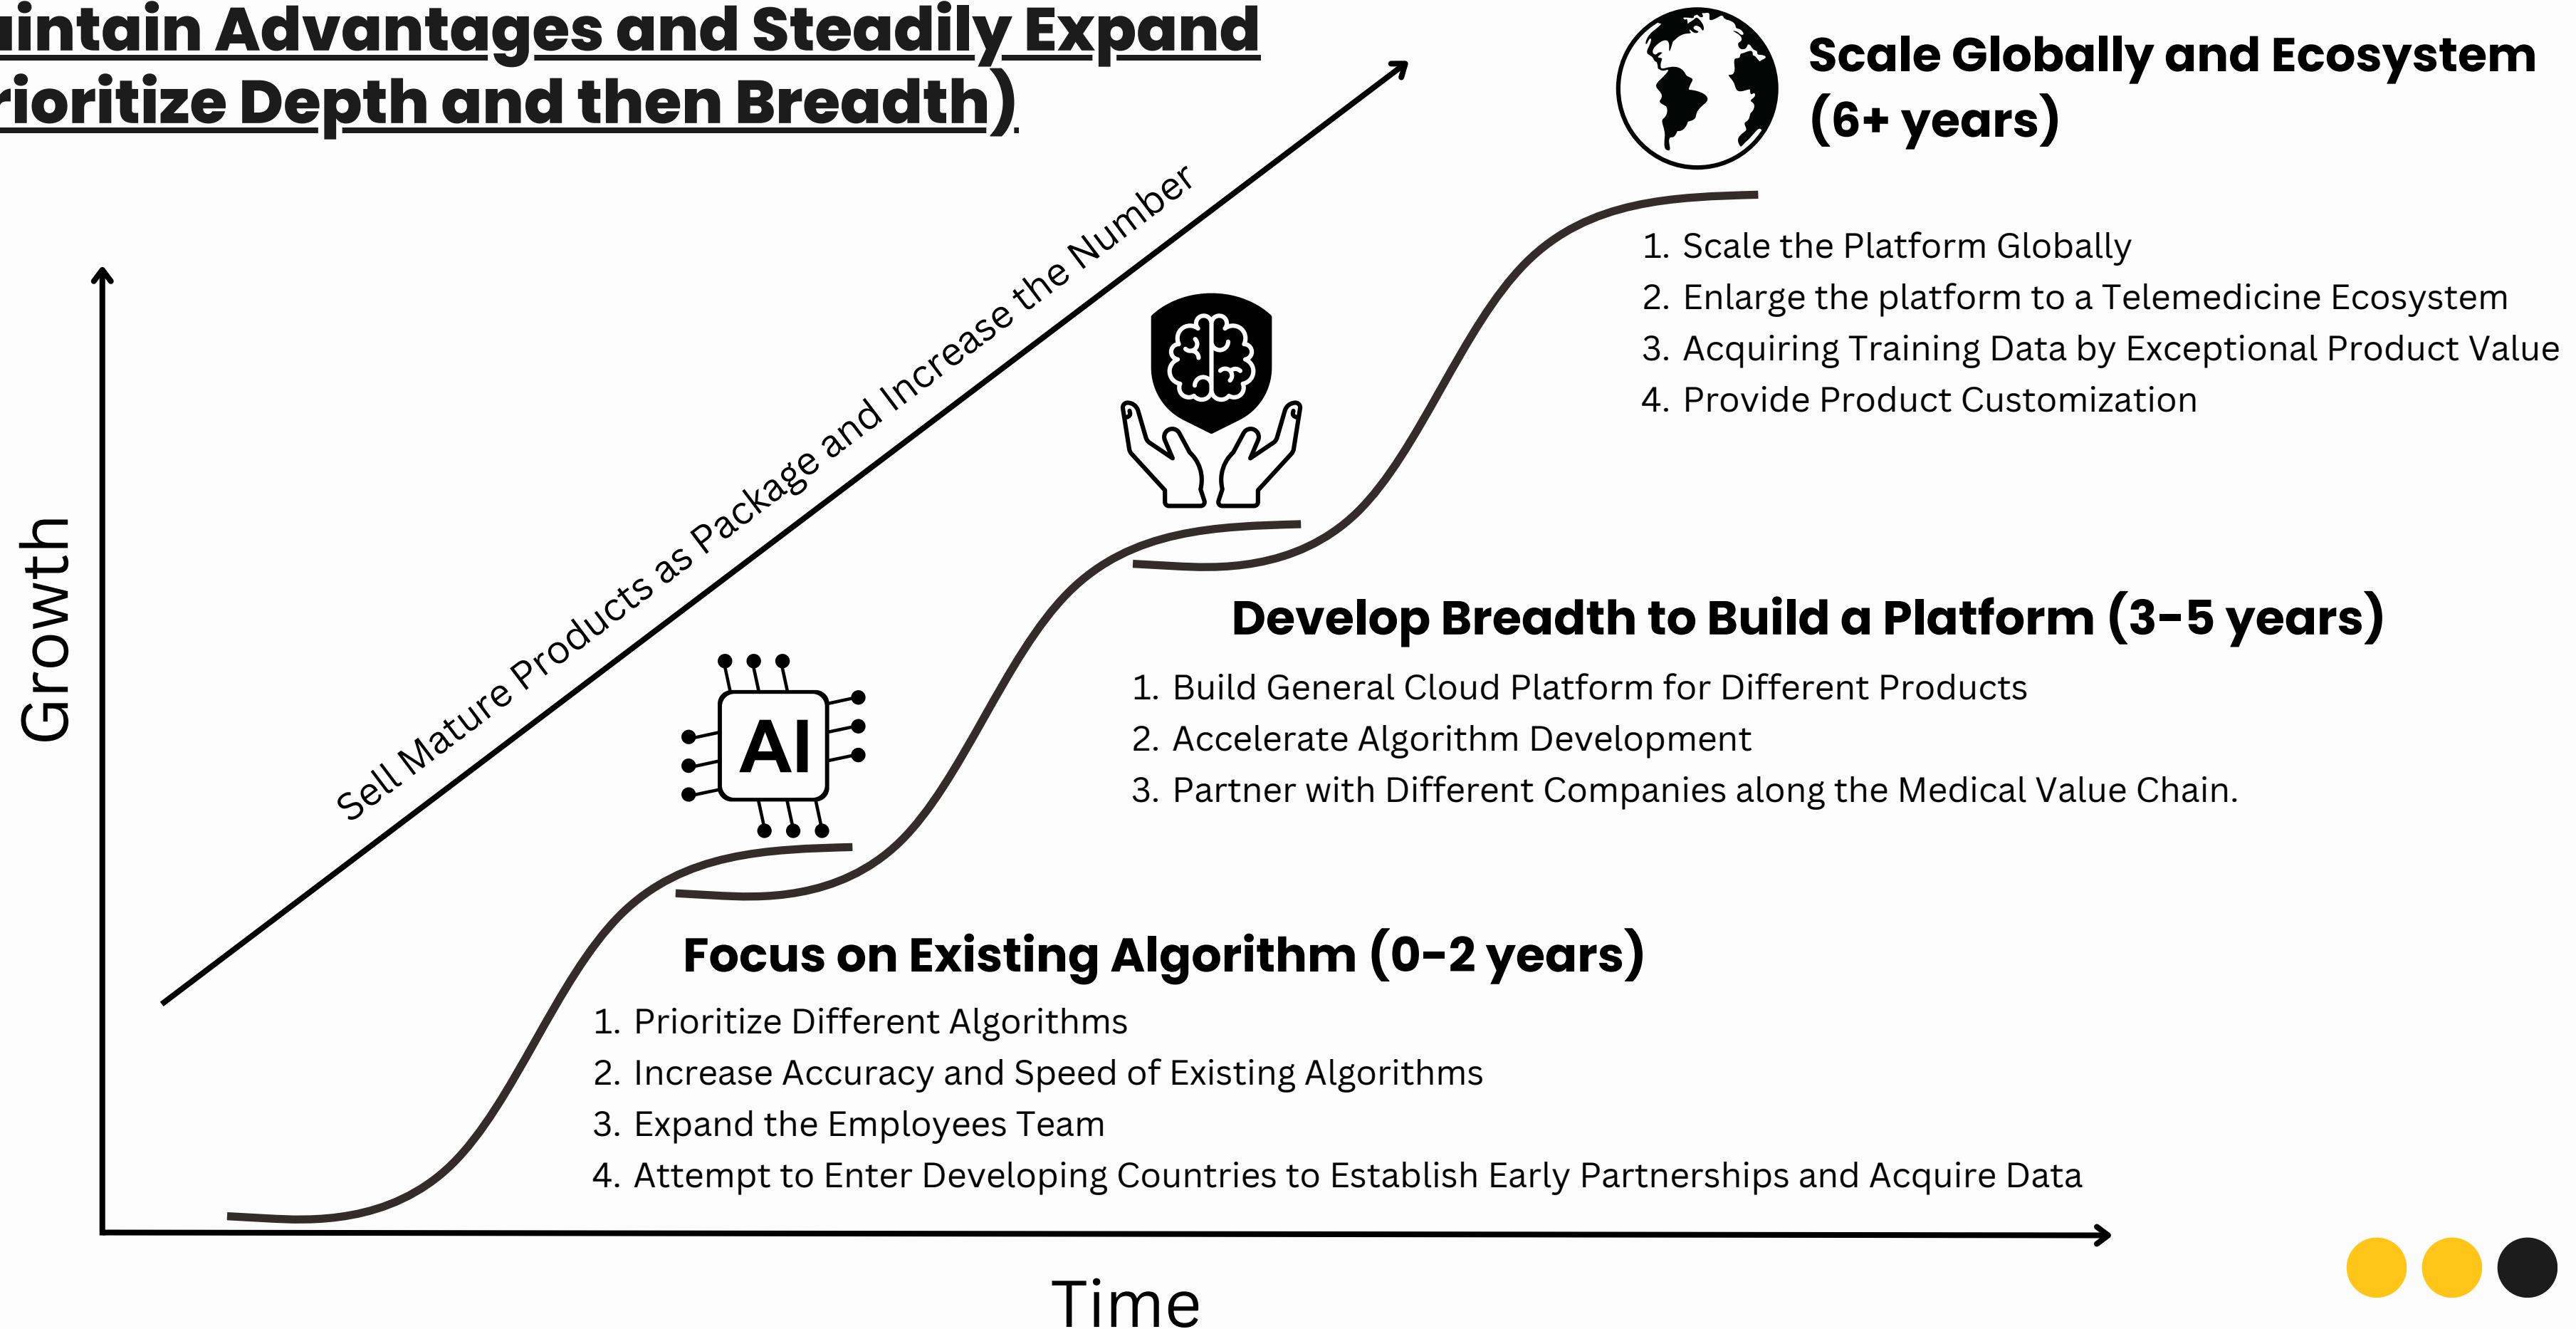

Differentiators

- Focus on AI-powered radiology tools to assist doctors
- Rich healthcare data set
- Price

Staging

Maintain Advantages and Steadily Expand
(Prioritize Depth and then Breadth)

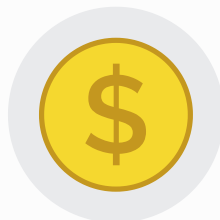

Economic Logic

Key Cost Drivers

- Algorithms Development
- Sales and Marketing
- Expansion of the Employees Team
- Cloud Infrastructure Building and Operations
- Economies of Scale once infrastructure is built.
 - Marginal cost decreasing to analyze an additional scan is low.
 - Marginal cost decreasing to marketing extra features.

Key Revenue Drivers

- Volume of Scans Analyzed
- Subscription Model for Zebra future Cloud Platform
- Customized Algorithm or Product

Thank You
